

Calls

Export calls

Export Call Data

This endpoint exports call data for a specific agent within a given date range, including call metadata, field values, and extracted results. The data is returned as a CSV file suitable for analysis and reporting.

Request Body

The request accepts a JSON object with the following properties:

- `agent_id` (UUID, required): The ID of the agent to export calls for
- `filters` (object, required): Filtering criteria for the calls to export
 - `start_datetime` (string, required): Start of the date range (ISO8601 format)
 - `end_datetime` (string, required): End of the date range (ISO8601 format)
 - `id` (UUID, optional): Filter by specific call ID
 - `status` (string, optional): Filter by call status (e.g., "completed", "failed", "in_progress")
 - `customer_phone_number` (string, optional): Filter by customer phone number

Response

On success, the endpoint returns:

- Status code: `200 OK`
- Content-Type: `text/csv`
- Body: CSV data with call records

CSV Format

The CSV file includes the following types of columns:

- Base call data:** Prefixed with uppercase column names (e.g., `ID` , `DIRECTION` , `CREATED_AT`)
- Field values:** Prefixed with `FIELD_` and the field name (e.g., `FIELD_CUSTOMER_NAME`)
- Result values:** Prefixed with `RESULT_` and the result name (e.g., `RESULT_APPOINTMENT_CONFIRMED`)

Excluded Data

To keep the export manageable, the following data is excluded:

- Complete transcript content (too large)
- Internal system fields
- Empty or null values
- Private configuration fields

Common Errors

- `400 Bad Request` : If the start date is after the end date
- `403 Forbidden` : If you lack permissions to access the requested call data
- `404 Not Found` : If no calls match the specified criteria

Example

```
curl -X POST "https://api.leaping.ai/v1/calls/export" \
-H "Content-Type: application/json" \
-H "Authorization: Bearer YOUR_TOKEN" \
-d '{
  "agent_id": "550e8400-e29b-41d4-a716-446655440000",
  "filters": {
    "start_datetime": "2025-04-01T00:00:00Z",
    "end_datetime": "2025-04-30T23:59:59Z",
    "status": "completed"
  }
}'
```

Usage with Scheduled Calls

This endpoint is particularly useful for analyzing outcomes of scheduled call campaigns. After scheduling calls with the `/calls/schedule` endpoint, you can use this endpoint to export the results and track performance.
